PROCESSING A COLOR)	
PHOTOGRAPHIC MATERIAL)	

COMMENTS ON STATEMENT OF REASONS FOR ALLOWANCE

Commissioner for Patents
P.O. Box 1450
Alexandria, VA 22313-1450

Sir:

Applicant notes that in the statement of reasons for allowance set forth at page 2 of the

Notice of Allowability, the Examiner has taken the following position:

The bleaching step alone on a conventional exposed and color developed silver halide color photographic material in the instant claims to only oxidize the exposed silver ions that is distinct from the combined bleaching and fixing composition and step in Kuykendall et al.

However, the claims do not exclude the use of a fixing agent in the bleaching composition thereof.

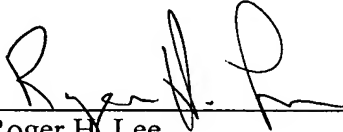

As discussed in the Amendment Under 37 C.F.R. §1.114 filed May 5, 2004, claim 1 is allowable over U.S. Patent No. 6,534,253 (*Kuykendall et al*) at least because *Kuykendall et al* fails to disclose or suggest that a bleach composition is introduced to a color photographic material at least about 24 hours after the steps a) and b) are conducted.

If the Examiner has any questions regarding the above, the Examiner is invited to contact the undersigned at the telephone number listed below.

Respectfully submitted,

BURNS, DOANE, SWECKER & MATHIS, L.L.P.

Date: June 8, 2005
